

Centre for Instructional Technology

Director

Learning Infrastructure

IVLE

Systems

The team is responsible for the management, maintenance, training and enhancements to NUS' learning management systems called the Integrated Virtual Learning Environment (IVLE). This includes complete code development and integration support for multiple third-party applications to IVLE. Other responsibilities include native development and support of IVLE on iOS and Android devices.

The team is also responsible for non-IVLE educational application development and campus-wide e-assessment support.

The team's duties covers system support, performance and security of all CIT's network appliances, CIT's servers and cloud-based services. The team is also responsible for supporting NUS' streaming infrastructures and media repositories (NUS YouTube and MediaSpace).

Education Technology

The team duties include the development and support for teaching pedagogies such as blended learning courses, NUS online courses and MOOCs. Besides support for these teaching pedagogies, other areas of responsibilities include courseware and website development for faculty in support for their teaching, educational software training and out-reach activities.

Multimedia

Blended (iBLOCs, Flipped), MOOC

Events, Seminars

A subset of this team is dedicated to providing video production support for any faculty that would like to experiment with new teaching pedagogies such as iBLOCs and MOOCs. The teams also creates promotional video for NUS courses and instructional video for specific modules.

A subset of the team covers event, seminar recordings and video coverage of NUS Commencement ceremonies. They also undertake the creation of informational, instructional and promotion videos.

University Town

This team manages and maintains all the teaching facilities and audio-video support for University Town's teaching seminar rooms. They are also responsible for planning for upgrades to the teaching facilities at University Town.

Administration

Administration, secretarial, finance and budget responsibilities for CIT. Additional responsibilities include out-reach activities, conference and event management and service support duties.

Education IT Unit

A cross functional support team to support strategic technology-enhanced education projects initiated by NUS.
