Poll Everywhere

- Poll Everywhere can be used to ask or gather questions during class.

- Participants respond by visiting a url / webpage.

- Results will be updated live and can be exported after class.

- It can be integrated with PowerPoint, Key Note, or Google Slides (*plugin installation required) or run directly from the website.

Basic Tasks

- How to login and change username

- How to create questions

- How to insert the questions into PowerPoint

- How to present the question from the web / PowerPoint

- How to export results

- How to track students

Tracking Students – Option 1

1. Create one **Open-ended question** to ask students to enter their Student number / NUS student ID / Name.
   Example of the question: *Please enter your NUS student ID, the one in the following format: e0123456.*

2. Have the question in every session – beginning / end of session.

Tracking Students – Option 2

1. **Restrict** the questions **to registered participants** only

   → This will force participants to login before answering.

2. NUS student and staff should login using SSO, i.e. **NUS id and password**.

Tracking Students – Option 2

Tips

- Test your questions.

- Email students beforehand about the url that will be used so that they can bookmark it.

- If grading is required, use the first session as practice so that everyone is familiar with the process.

- If LT's computer is going to be used and plugin is required, check this beforehand.

Summary

1. Login to **www.polleverywhere.com**

2. Create and put questions into folder.

3. (IF REQUIRED) Decide how you want to track the students.

4. Present the questions. If integration to PowerPoint, Key Note, or Google Slides is required, please ensure plugins is installed in the computer.

5. (IF REQUIRED) Export report.
