How do I start developing content in IVLE?

1. First and foremost, you need to create a module (How to create a module?), and add in module information.

2. You may start creating the tools and add in the course contents. Below are the various tools available to support your teaching:
   - Announcement (Announcement)
   - Assessment (Assessment Starter Guide)
   - Files (Files)
   - Forum (Forum)
   - Gradebook (Gradebook Starter Guide)
   - Lesson Plan (Lesson Plan)
   - Multimedia (Multimedia Starter Guide)
   - Poll (Poll Starter Guide)
   - Project (Project Starter Guide)
   - Survey (Survey Starter Guide)

3. Check students in the Class and Groups (Class & Groups).

4. There are many features and reports available. Happy exploring!
