

How to enable Learning Flow?

The process to enable Learning Flow are as follows:

1. Click the module card from the landing page, you will be brought to the module page.
2. Click **ENABLE LEARNING FLOW** button that you can find on the right hand side.

Note: The **ENABLE LEARNING FLOW** button only appears on a newly created module or on a module where Learning Flow is disabled. If you cannot see this button that means Learning Flow is already enabled.

3. Select the format of your Learning Flow*.

For format following NUS Academic Calendar, the additional options that you need to decide on are to auto-populate the timetable events and whether to reveal the weeks according to the calendar or all at once.

Note: You need to make the changes to the timetable events in Learning flow if there is any timetable changes after that.

A screenshot of the 'Enable Learning Flow' dialog box. The title is 'Enable Learning Flow' with a close button (X) in the top right. The main text explains that Learning Flow allows planning lessons throughout the semester. The 'Format' section has three options: 'NUS Academic Calendar' (selected with a green radio button), 'Yes, I want to auto-populate the timetable events too.' (unchecked), and 'Free-format' (unchecked). The 'Display Options' section has two options: 'All Weeks' (selected with a green radio button) and 'Display till Current Week' (unchecked). The 'Publish Week' section has a 'No' button selected, with the text 'Yes, to publish all weeks.' below it.

For free-format, the additional option that you need to specify is the number of topic.

Enable Learning Flow

The Learning Flow allows you to plan and organise your lessons throughout the semester. It helps students access resources directly and understand how they can navigate through the course. You can customize the Learning Flow to create a specific workflow for your students.

Format

- NUS Academic Calendar
Plan your lessons around the NUS Academic Calendar
- Free-format
Set your own topic and dates

i Should I choose NUS Academic Calendar format or Free-Format?

There is no right or wrong answer in this. It all depends on the module's requirement.

When you choose Free-Format / by topic, you can still specify the period / duration in which that topic will be taught / learned.

When you choose NUS Academic calendar format, weeks such as recess, reading week, examination week will be indicated in the header. All your scheduled events such as lecture, exams, will also be automatically added into the weeks. These events will not be able to remove.

If you are unsure which format to use, the recommendation is to choose NUS Academic year since this will likely feel more familiar to you.
