

Allow reviewers (not students) to access past modules

If you need to open up your past modules which are expired/closed/published for peer review reasons, but do not want the module's past students to continue accessing it, you may add the reviewers into module's facilitators as *read managers*.

For more info, refer to [Add or remove facilitators](#).

Add Facilitator to Module ✕

If you are adding [NUS alumni](#), select **Create/Add Non-NUS User** and add their personal email instead of their lifelong NUS email. This is because alumni will not be able to login using their NUS credentials.
