

# ICT cooperation, EU and South Korea

## Introduction

Accompany by the grow of the "tiger economy", ICT in South Korea has been invested as a leading industry. As a any other economy, cooperation in ICT between companies and companies as well as countries and countries is extremely necessary. Therefore, a website was created in order to provide Korean and European organisations and individuals the most useful and updated information on projects and cooperations in the field of ICT. Let have a look at it for more information on ICT cooperation between EU and South Korea:
