

WIKI Project Main Page

[e-Taiwan: 2002-2007](#)
Build ICT infrastructure,
Government Services online.

[M-Taiwan: 2005-2008](#)
Advance e-usage and
applications from users'
point of view.

[u-Taiwan: 2007-2011](#)
A Ubiquitous Networked Society
with comprehensive
e-Services.

Future improvements

- ~~All our news are currently organized in categories. We may need to branch out more if it gets too extensive.~~
Solved: We now have both categories and chronological order. Looks much neater. Articles are also sorted by months by default as well!
- More interesting names to categories our news.
Noted: It's news after all. We wanted our categories to be functional.
- ~~Expand to other categories of news~~
Solved: We now have 7 categories of news and in each, we provided a concise review of the area concerned.
- ~~Expand to other countries~~
We did include comparison studies with countries such as Russia, USA and Saudi while doing the case study for "A Wireless Taipei". We did not focus more on other countries because it was beyond the scope of this project.
